

## Css project ideas

### Beginner Projects

Personal Portfolio – Create a simple one-page portfolio with your bio, projects, and contact details.

Landing Page – Design a landing page for a product, service, or event.

Login & Signup Form – Style a login/sign-up form with hover effects and transitions.

Animated Buttons – Build different types of buttons with hover, ripple, and gradient effects.

Profile Card – Create a stylish profile card with image, name, and social media icons.

### Intermediate Projects

Responsive Navigation Menu – Develop a fully responsive navbar with dropdown menus.

CSS Grid Gallery – Design a responsive image gallery using CSS Grid.

Pricing Table – Create a pricing table with different plan options and hover effects.

Parallax Scrolling Website – Implement a smooth parallax effect for a website.

Interactive Image Slider – Build an image slider using only CSS (without JavaScript).

### Advanced Projects

CSS-Only Animated Website – Create a fully animated webpage using CSS animations and keyframes.

Neumorphism UI Design – Design a neumorphic user interface with soft shadows.

Dark Mode Toggle – Implement a CSS-only dark mode toggle for a website.

Glassmorphism Dashboard – Design a glassmorphism-style admin dashboard UI.

3D CSS Effects – Create 3D buttons, cards, or hover effects using CSS transformations
